Hardware

Hardware & fittings are made of high corrosion resistant **stainless steel grade AISI 304**. Adjustable legs are made of **stainless steel grade AISI 316** for greater resistance. Top quality hardware specially made for 13mm panels.

System Components

*System technical specification and data sheets available upon request.

System Dimensions

Overall nominal system height (including headrail): 2020mm (± 20 mm).

Panel Height: 1820 mm.

Adjustable foot Height: 150mm (± 20 mm).

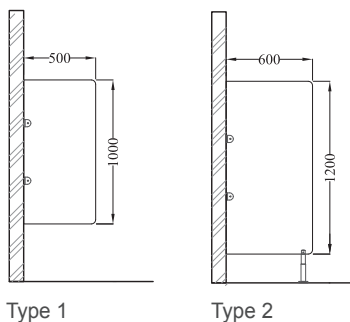

Recommended System Depth 1500mm.

* System dimensions are adjusted based on site requirements.

* Special design and dimension are considered for special users (i.e. wheelchair users, children).

Complementary Items:

Urinal Partitions

Type 1

Type 2

* Urinal top shelf can be added upon request.

Vanity Tops

13mm HPL.

Easy to clean/ water resistant.

Customized Shapes and Sizes.

System Advantages

- » Modular
- » Durable
- » Flexible
- » Design friendly
- » Decorative
- » Easy to install
- » Space Utilization
- » Cost Efficient
- » Maintenance free
